

ABOUT MANION TRUSS

Our mission at Manion Truss is to provide retail lumberyards high-quality products at reasonable prices in a timely manner, with the best service in the industry. We pride ourselves on our customer service and taking care of our customers from the time the plans are drawn to after the trusses are set.

Our qualified team takes a hands-on approach to provide outstanding customer service from the preliminary stages, through design & production, to final delivery, and beyond.

MANION DIFFERENCE

CUSTOM COMPONENTS

We provide more than just trusses! With a full time engineered wood specialist on staff, we provide everything from I-Joist roof and floor packages to complete tall wall packages.

TOP-TIER FACILITIES

In Manion's top-tier production facilities, we utilize computer controlled saws and automated jiggling production tables to ensure accuracy and precision on every truss we produce.

A NEW PERSPECTIVE

With 3D viewing tools we can offer a realistic, first-person perspective with a walkthrough mode allowing customers to visualize components from within the project.

BUILDING SOLUTIONS FOR COMMERCIAL & RESIDENTIAL PROJECTS

Whether your customers are looking to renovate or build from the ground up, with basic spec homes or large commercial complexes, Manion Truss will assist in building dreams into reality.

TOP-QUALITY TRUSSES USING ALPINE DESIGN SOFTWARE

Alpine's truss software successfully enables Manion Truss to design, manufacture, and sell the highest quality roof and floor components for residential and commercial constructions. Manion Truss has the ability to frame out trusses efficiently and precisely using Alpine's iModel truss condition tools.

Together, we prepare your business for the future.
